## PROJECTS

- **Automated Spotify Recommendation Bot:**  
This will automatically recommend you the best songs based on your searches and saves on Spotify. This bot is created using the Selenium Webdriver along with Python.
- **Turtle Library Implementation:**  
Build several intermediate projects with the help of Turtle Library in Python.
- **Stock Trading News Alert Project:**  
This application is implemented using Alpha Vantage Stock Price API, News API and Twilio API along with Python. This application not only tracks the current stock prices of the selected stocks but updates in real time and alerts you on any news related to the stocks by messaging you.
- **TabsUp - An E-commerce Music Store website (Ongoing):**  
This website is made using the MERN Stack with basic E-commerce functionalities like a Recommendation system and multiple payment gateways.
- **Other Minor projects:**
  1. Rainfall prediction (Machine Learning)
  2. Smart Attendance System (Computer Vision)
  3. Twitter Complaint Bot (Selenium Webdriver along with Python)
  4. Search as you type functionality (Elk Stack)
